2 ABSTRACT

3   In an embodiment of the invention, a method for

4 providing a visitor safe wireless printer access point,

5 includes: connecting a wireless computing device to a

6 wireless network, where the wireless network provides an

7 access point to a print spooling device; determining

8 available printers in a secure wired network; selecting

9 one of the available printers for printing; establishing a

10 print path through the spooling device to the selected

11 printer; sending a print job via the wireless network to

12 the spooling device; spooling the print job on the

13 spooling device; and sending the print job via the secure

14 wired network to the selected printer.
